

Carson recommendations are based on plant material known to perform well in area, are already being used on site, have long term good aesthetic qualities, maintain well and create the look that has been presented to us as wanted in the community.

Categories of Water Needs

Category	Abbreviation	Percentage of ET _o
High	H	70-90
Moderate/Medium	M	40-60
Low	L	10-30
Very Low	VL	< 10

ET_o = amount of water lost due to evaporation and plant transpiration

Note: any L plant on same irrigation valve as M plant will use same amount of water as M plant. Only way to use less water with L vs M is to plant only L plants in the same irrigation valve.
