

7000 F

SECOND FLOOR PLAN

Spaciousness and warmth are the outstanding characteristics of the 7000. Beginning with a separate tiled entry, with powder room and guest closet. A large comfortable living room opens and extends into the dining room and kitchen with its wall to wall expanse of glass, looking into an enclosed garden patio. Upstairs, double doors open into a luxurious master bedroom with its private bath, double vanity and a lavish amount of closet space. The additional second and third bedrooms are also unusually large.

Totally modern electric heating, air conditioning and appliances by General Electric.
